

CardioSaarthi — Proposed System Architecture

Clinical facts are computed, never generated. The model writes explanations only, from faculty-approved sources.

1 CONTENT PREPARATION (offline, run once)

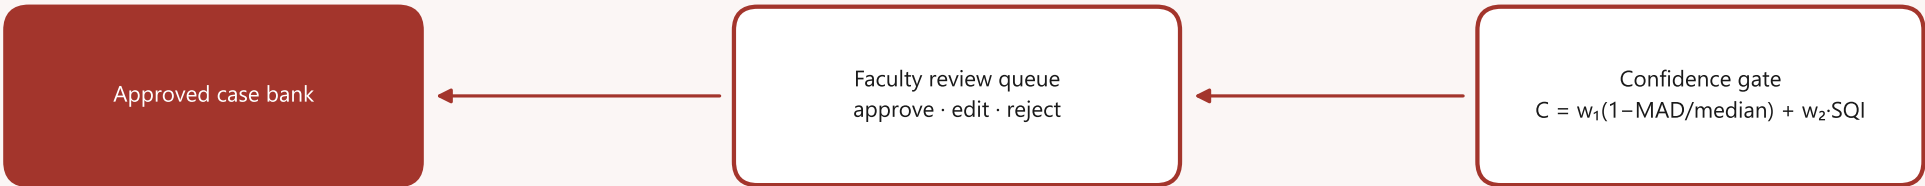

Deterministic signal processing — no model involved.

Diagnoses are inherited from the dataset's cardiologist annotations — never computed here.

2 FACULTY APPROVAL GATE

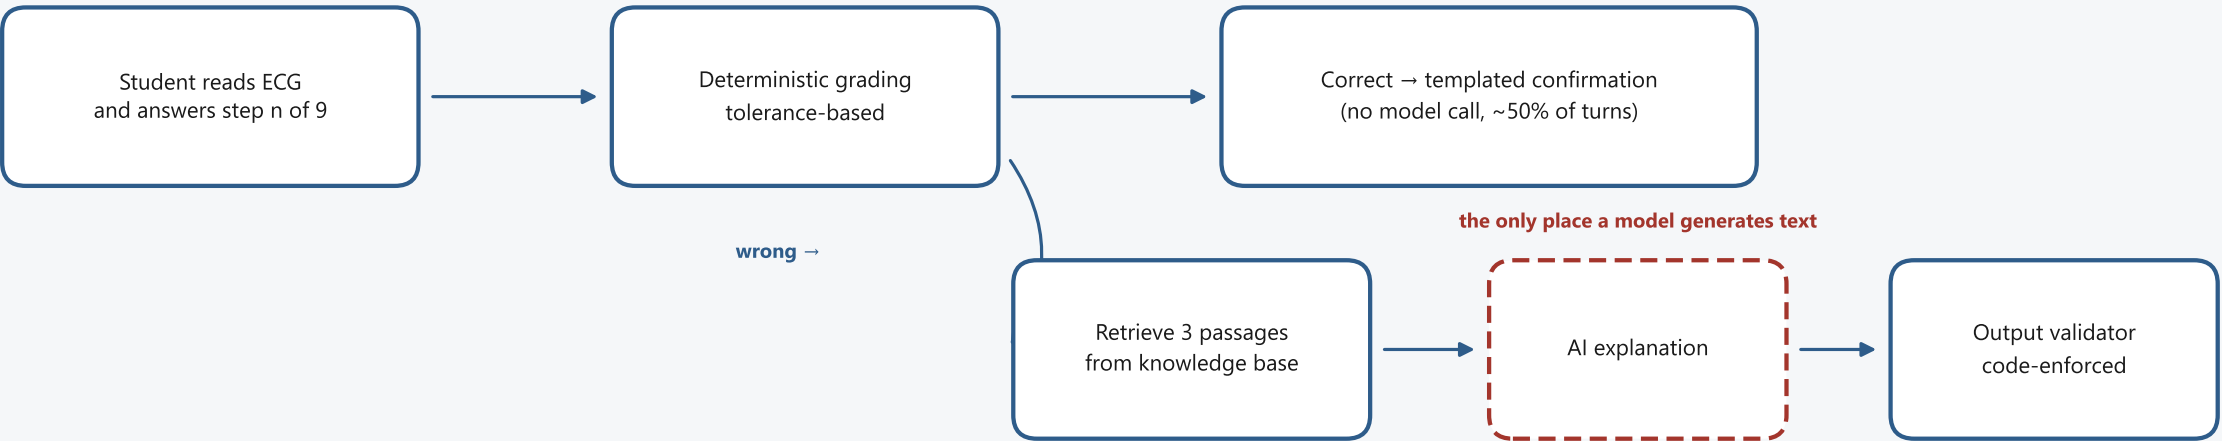

Nothing reaches a student unreviewed.

385 released · 327 withheld (of 714 measured)

3 STUDENT RUNTIME (online)

Control flow is code; the model only writes text.

the only place a model generates text

rejected → retry, then stored fallback
